Battery Lowering Kit

No Power? No Problem.

The Vertical Express Battery Lowering Kit is a worry-free solution for building owners and managers in the event of a power outage. Available on hydraulic passenger elevators, the emergency lowering system provides supplemental power to the elevator controller. It operates by monitoring the elevator for power loss, phase reversal and low voltage conditions. If any of these conditions occur, the lowering system is activated. It then closes the doors and sends the elevator to the main exit landing of the building and reopens the doors, allowing passengers to exit safely. The elevator returns to normal operation when power is restored.

Features and Benefits

- Specifically designed for hydraulic elevators
- Reliable solid-state circuitry ensures proper operation
- Small, self-contained unit can be mounted on any wall
- Maintenance-free battery
- Improves passenger safety by eliminating the possibility of entrapment during a power outage
- Custom-engineered to operate with your existing controller
- Requires a signal from the main disconnect when power has been removed during maintenance

Getting trapped in an elevator during a power failure can be frightening to the passengers. With a Battery Lowering Kit, you can be confident knowing your equipment is safe for them to ride, even if a power outage occurs. Order a Battery Lowering Kit from your Vertical Express representative or call (866) 448-3789 toll free.
