Solid State Starters

Power Surges Minimized

Why replace contacts when you can upgrade to the reliability of a solid-state starter? Vertical Express offers the most advanced elevator starter, which applies smooth and steady current to a motor.

Conventional motor starters can cause power surges, or “spikes”, which limits the optimal performance of other systems throughout the building. Solid state starters eliminate sudden power surges, reducing the elevator system’s impact on electrical equipment in the building. And, solid state starters are flexible, allowing you to select the starting current that is best for your motor.

Benefits:

- Reduced maintenance
- Phase loss protection, preventing motor burnouts and extended shutdowns
- Optimal motor start-up time for shorter floor-to-floor times
- Less severe starting currents, prolonging motor life
- Contacts are eliminated, resulting in noise reduction during normal operation

When you order from Vertical Express, you can rest assured that you have a product that has been designed for consistent operation and superior safety. To choose the Vertical Express Solid State Starter for your application, contact your local Vertical Express sales representative or call (866)448-3789 toll-free.
